In Re: Patent Term Extension  
Application for  
U.S. Patent No. 5,041,126

## NOTICE OF FINAL DETERMINATION

A determination has been made that U.S. Patent No. 5,041,126, which claims the medical device Cook GRIT™ Coronary Stent, is eligible for patent term extension under 35 U.S.C. § 156. The period of extension has been determined to be 340 days.

A single request for reconsideration of this final determination as to the length of extension of the term of the patent may be made if filed within one month of the date of this notice. Extensions of time under 37 CFR § 1.136(a) are not applicable to this time period. In the absence of such request for reconsideration, the Commissioner will issue a certificate of extension, under seal, for a period of 340 days.

The period of extension has been calculated using the FDA determination of the length of the regulatory review period published in the Federal Register of August 7, 1998 (63 Fed. Reg. 42408). Under 35 U.S.C. § 156(c):

$$\begin{aligned}\text{Period of Extension} &= \frac{1}{2} (\text{Testing Phase}) + \text{Approval Phase} \\ &= \frac{1}{2} (343) + 168 \\ &= 340 \text{ days}\end{aligned}$$

Since the regulatory review period began December 20, 1995, after the patent issue date (August 20, 1991), the entire period has been considered in the above determination. No determination of a lack of due diligence under 35 U.S.C. § 156(c)(1) was made.

Neither the limitations of 35 U.S.C. § 156(g)(6) nor the 14 year limitation of 35 U.S.C. § 156(c)(3) operate to reduce the period of extension determined above.

Upon issuance of the certificate of extension, the following information will be published in the Official Gazette:
